

Waterloo Acoustics Ltd

Waterloo Acoustics have successfully completed an Acoustic Louvred Screen to the rooftop plant of the new Travel Lodge at Bracknell (April 2008).

The screen was designed against stringent noise criteria to ensure plant noise emissions do not impact upon surrounding properties. Detailed interface with existing steelwork ensured a high tolerance fit with all other services.

Speaking in praise of Waterloo Acoustics, Ian Chorlton (Project manager for George and Harding Construction Limited) commented that “on the Bracknell Travelodge Waterloo Acoustics worked in an efficient organised manor within tight programme constraints”.

Work in Progress
